PROFILE

Motivated Back End Developer Skilled in building scalable APIs and backend systems with emerging technologies. Delivered production-ready software for multi-branch businesses and attention to detail. Certified in backend development, with strong problem-solving skills and remote teamwork experience.

PROFESSIONAL EXPERIENCE

Backend Engineer

Dec 2024 – Mar 2025

Zed - (Remote)

Giza, Egypt

- Built the backend for a Point of Sale (POS) and Inventory Management System used by a retail company to track products across multiple branches and warehouses.
- The system also included reporting tools that gave the team insights into sales and stock levels. I was in charge of the entire backend, using Laravel 11 to develop RESTful APIs with MySQL and performance tuning.
- I collaborated closely with the frontend developer for implement best practices to define API endpoints and make sure the frontend and backend worked seamlessly together.
- Deployed the project on Hostinger and regularly shipped updates, including performance improvements and small fixes. We used version control systems like Git and to keep our workflow organized.
- This was a freelance project I worked on during university, and it gave me hands-on experience with real-world development, communication, and balancing deadlines with other commitments.

SKILLS

Node.js | Python | PHP | Java | Express.js | Laravel (PHP) | MySQL | MongoDB | Git / GitHub |
Data Structures & Algorithms | Linux command-line | OOP | RESTful APIs | Problem-Solving |
HTML&CSS
